Backend Developer

Itajaí/SC

Resumo

Pragmatic .NET/C# backend dev(currently), my goal is to turn complex requirements into reliable and maintainable systems, but I like building stuff for fun too!

I'm experienced in various technologies and tools. Some of the projects I have worked on involved the use of: .NET Core, JavaScript, Node.js, ReactJS, MySQL, Oracle, SQL Server, MongoDB, Docker, Microservices, Unit Testing, DevOps.

Professional Experience

Backend Developer

QUAY, Itajaí/SC

Currently working as a .NET backend developer, implementing various types of intranet systems and portals. Currently outsourced to the largest power distribution company in Brazil.

Equatorial

October/2018 - Now

Backend Developer

GRUPOW, Balneário Camboriú/SC

I worked as a backend developer, building several applications for major brands such as Mondelez, Pepsico, Microsoft, and Beto Carrero.

In most projects, I used PHP with Yii2 and ColdFusion with a proprietary framework.

April/2013 - September/2018

Full Stack Dev

Arroba Design, Itajaí/SC

I worked on the development of websites in general, where I had the opportunity to introduce the team to best practices, reusable components, and design patterns.

January/2011 - March/2013

Freelancer Full Stack Dev

Itajaí/SC

As a freelancer, I worked on the development of websites in general, as well as a variety of web applications and e-commerce solutions.

December/2008 - December/2010

Graduation

Technology degree in Systems Analysis and Development

UnigranNET, Itajaí, SC – April/2018 – December/2020
